## SPECIAL NOTES

Please read carefully:

- Before installing the lock, familiarise yourself with the installation and operating instructions.
- The factory preset combination is 0-0-0-0.
- Your KitLock is supplied ready to fit to doors up to $18 \mathrm{~mm}(11 / 16$ ") thick.

## FITTING INSTRUCTIONS

The KitLock can be fitted to cabinets, cupboards and lockers etc. as a direct replacement for existing cam locks. It can also be fitted easily to cupboards and cabinets that do not have an existing locking device.

Fixing Pack A Default Supply

## INSTALLATION GUIDE

## A Replace existing cam lock with KitLock

Step 1 Remove existing cam lock.
Step 2 Fit the KitLock to the door, passing the spindle through the existing hole.

Step 3 Now secure the lock by threading the hex nut onto the spindle.

Step 4 Fit cam and secure with screw.
Step 5 Now check the operation of the lock using the factory preset combination 0-0-0-0.

Step 6 If the lock is functioning correctly, change the code using the instructions overleaf.

## USING THE LOCK

1 With the indicator in the open position, turn the dials to the factory preset combination 0-0-0-0. Note: If you have already changed the code, use your current combination for this step.

2 Turn the dials to your desired combination. Once you have chosen and set your combination, turn the outer casing so the indicator is in the locked position.

3 Make a note of your chosen combination and scramble the dials. The lock is now locked.
4 To reopen, rotate the dials to your chosen combination and turn the outer casing so the indicator is in the open position.

## FINDING THE CODE

Note This function requires the Code Finding Key (sold separately).
1 Insert the Code Finding Key when the indicator is in the locked position.

2 Turn the key clockwise 90 degrees.

3 Gently rotate each dial upwards until it stops. This is your code.

4 Turn the key anticlockwise 90 degrees and remove.
