### Codelocks announces Midwest distribution center expansion

Rancho Cucamonga, CA, August 2 2022

Codelocks Inc., a leading access control company designing and distributing innovative, access control solutions and keyless door locks, today announced its expansion in Indianapolis, Indiana with the opening of its first facility outside the California Headquarters.

This distribution facility at 5715 W. 85th St. will allow Codelocks to better serve its customers in the middle and eastern regions of the United States. The facility will be used to distribute its large range of Codelocks access products and KitLock by Codelocks range, including heavy- and light-duty push-button mechanical locks, digital electronic locks, smart locks and stylish locks. In addition, Gate Solutions by Codelocks will also be a key product distributed from the new facility.

“We are pleased to have a distribution center located in the central part of the U.S. to better serve our growing customer base,” said Matt Welty, Vice President, Americas at Codelocks. “This marks a major growth milestone for Codelocks. With this expansion, we are able to cut down on transit times for key customers and open up more opportunities for future growth.”

Colin Campbell, President, Americas at Codelocks added, “During the pandemic, it was clear that customers were struggling with product availability and lead times became one of the key buying criteria. This investment allows us to further increase our significant stockholding and give better service to the Midwest and eastern states.
